

# Despliegue del Sistema en AWS

```
graph TD; A[Despliegue del Sistema en AWS] --> B[1. Configuración]; A --> C[2. Despliegue]; B --> B1[1.1. Configuración Base de Datos Julia]; B --> B2[1.2. Configuración Servidor Web Sergio]; C --> C1[2.1. Despliegue Base de Datos Julia]; C --> C2[2.2. Despliegue Servidor Web Sergio];
```

This flowchart illustrates the deployment process of a system on AWS. It starts with a main goal, 'Despliegue del Sistema en AWS', which branches into two primary phases: '1. Configuración' (Configuration) and '2. Despliegue' (Deployment). The '1. Configuración' phase is further divided into '1.1. Configuración Base de Datos Julia' and '1.2. Configuración Servidor Web Sergio'. Similarly, the '2. Despliegue' phase is divided into '2.1. Despliegue Base de Datos Julia' and '2.2. Despliegue Servidor Web Sergio'. Each sub-step is associated with a specific person's name in red text: Julia for database-related tasks and Sergio for web server-related tasks.

## 1. Configuración

1.1. Configuración  
Base de Datos  
Julia

1.2. Configuración  
Servidor Web  
Sergio

## 2. Despliegue

2.1. Despliegue  
Base de Datos  
Julia

2.2. Despliegue  
Servidor Web  
Sergio
